My name is Clint Carlson, I am the owner of Carlson Homes, Inc. We are a custom commercial and home building company focusing on the east side of the Big Island of Hawaii. We are a top rated and sought after builder for over ten years because of our commitment to excellence and integrity. Our slogan "Signature Quality Work" means that I (and every one of my employees) would be proud to sign our name to any thing we do from foundation to finish.

We create custom homes that exceed all expectations.

Let us build the home of your dreams!

Some of the things that set us apart from other builders and contractors start at the foundation with such things as superior site preparation, accurate forming, higher strength concrete with proper curing and saw cutting control joints. From there, tight, plumb, level and straight framing form the basis of an exceptional quality home. Even the small things like the underside of the eaves receive extreme attention to make rough lumber a finished product.

We only use composite wood or redwood for exterior trim, products that are knot-free and won't rot, crack, split or peel. We only use top quality paint and even the caulking we use is of the highest quality and won't shrink or crack. With that much attention to the outside, it only gets better on the inside with fit and finish that is unsurpassed. We truly are passionate about what we do and would love the opportunity to show you a wonderful home building experience that ends where lifetime friendships begin.
